

Interrupter for warning lamps for the tail lifts

Application:

- warning lights for the tail lifts- LDO 2135

This device is designed to trigger the pulsation of lamps LDO 2135.

Supply voltage: 12/24V

Description of the outgoing wires from the interrupter:

- PWR - for power supply (white - ground, black - "+")
- OUT 1 - for connection of controlled lamps (colors of cables correspond to the colors of wires of LDO 2135 lamps)

The interrupter is designed for connecting two LDO 2135 warning lamps.

Specification of cores:

- 1 copper pair cable $2 \times 0,75 \text{ mm}^2$, 1 m for power supply
- 2 single-core $1 \times 0,75 \text{ mm}^2$, length 0.2 m for connection of LDO 2135 lamps
